

ICND2 3.0 - Interconnecting Cisco Networking Devices, Part 2

Czas trwania:	Czas trwania: 5 dni / 40 godz.
Cena rynkowa:	3 680,00 zł
Cena promocyjna:	Zadzwo - 801 30 30 30
Szkolenie autoryzowane:	Tak

Informacje o szkoleniu

This course will provide students with the knowledge and skills needed to install, configure, operate, and troubleshoot a small enterprise network. It will ensure that students understand and are ready to deploy the latest shifts in technologies and solutions as follows:

Understanding of Quality of Service (QoS) elements and their applicability
How virtualized and cloud services will interact and impact enterprise networks
Overview of network programmability and the related controller types and tools that are available to support software-defined network architectures

A full suite of labs have been developed using the virtual IOS environment with flexible topologies that reinforce concepts with hands-on, guided discovery and challenge labs that align to each lesson module.

Wymagania wstępne

It is recommended, but not required, to have the following skills and knowledge before attending this course:

Understanding network fundamentals
Implementing local area networks
Implementing Internet connectivity
Managing network devices
Securing network devices
Implementing basic IPv6 connectivity

Zagadnienia poruszane podczas szkolenia

- Course Outline
- Module 1: Implement Scalable Medium-Sized Networks
- Module 2: Troubleshooting Basic Connectivity
- Module 3: Implementing an EIGRP-Based Solution
- Module 4: Summary Challenge
-

Module 5: Implement a Scalable OSPF-Based Solution

- ▣ Module 6: Wide-Area Networks
- ▣ Module 7: Network Device Management and Security
- ▣ Module 8: Summary Challenge
