

OR_GG12c_ACO - Oracle GoldenGate 12c: Advanced Configuration for Oracle

Czas trwania:	Czas trwania: 4 dni / 32 godz.
Cena rynkowa:	7 468,00 zł
Cena promocyjna:	Zadzwo - 801 30 30 30
Szkolenie autoryzowane:	Tak

Informacje o szkoleniu

Enrolling in this Oracle GoldenGate 12c training will help you develop your installation and configuration skills. By interacting with top Oracle instructors, you'll be able to ask questions as you learn to solidify your understanding. Benefits to You Integrate your organization's disparate data across heterogeneous databases for improved decision-making. Become more efficient at configuring and implementing the more advanced features of Oracle GoldenGate used together with the Oracle RDBMS 12c. Enable Zero-Downtime Migration Enable Zero-Downtime Migration: this course also allows you to simulate a system upgrade. You'll develop the skills needed to survive an aborted migration, incurring zero data loss. Hone these skills by engaging in hands-on demonstrations and exercises. Active-Active Replication and CDR You'll also build two-way and three-way active-active replication configurations. Explore both basic and advanced conflict detection and resolution (CDR). Review basic product-provided CDR, with more advanced custom CDR techniques implemented using SQLEXEC and stored procedures. Configure Integrated Extract Groups Configure Integrated Extract Groups and Integrated Replicat groups: the Integrated Extract feature and the recently introduced Integrated Replicat feature are also covered in depth. You'll learn to configure integrated extract groups operating in both local and downstream deployment modes and to configure Integrated Replicat groups, which enable automatic, dependency-aware parallel apply streams for dramatically improved data delivery performance. Learn to Utilize Advanced Features upon completing this course, you'll be able to utilize the more advanced features of Oracle GoldenGate 12c, including: integrated capture, integrated delivery, active-active replication, conflict detection and resolution, DDL/DML replication, Oracle GoldenGate event marker subsystem, advanced data manipulation and transformation techniques and advanced data mapping. In addition, you will use a simulated Oracle RAC configuration to experiment with the Oracle GoldenGate Clusterware-aware facilities, which ensure seamless data replication in case of node failure.

Benefits:

Learn to

Explain Oracle GoldenGate advanced configuration options.

Describe and take advantage of the Integrated Capture feature and the recently introduced Integrated Replicat feature to replicate complex data types and compressed data.

Integrate the Database File System (DBFS) with Oracle GoldenGate to achieve Maximum Availability.

Configure and implement the Oracle GoldenGate Event Marker system.

Enable data transformation based on event records in the transaction logs or in the trail files.

Perform zero-downtime database migration.

Set up and manage advanced deployment models, like 3-node multi master replication configuration.

Master Oracle GoldenGate facilities to detect and resolve data conflicts in active-to-active replication

implementations.

Use a simulated Oracle RAC configuration to experiment with the Oracle GoldenGate Clusterware-aware facilities, which ensure seamless data replication in case of node failure.

Do kogo skierowane jest to szkolenie

Administrator
Architect
Data Scientist
Database Administrator
Developer
System Integrator

Prerequisites

Suggested Prerequisite

Oracle GoldenGate 12c: Troubleshooting and Tuning Ed 1

Suggested Prerequisite

Oracle GoldenGate 12c: Fundamentals for Oracle Ed 1

Oracle GoldenGate 12c: Fundamentals for Oracle

Wymagania wstępne

Brak

Zagadnienia poruszane podczas szkolenia

- ❑ Familiarize the student with Data Conflict Avoidance Techniques
- ❑ Set up and manage advanced deployment models, such as 3-node multi master replication configurations
- ❑ Integrate Oracle GoldenGate with Oracle cluster configurations
- ❑ Explain Oracle GoldenGate Advanced Configuration options
- ❑ Describe and take advantage of the Integrated Capture feature to extract complex data types and compressed data
- ❑ Introduce the new Integrate Replicat feature for improved data delivery
- ❑ Configure and implement the Oracle GoldenGate Event Marker system, to enable data transformation based on event records in the transaction logs or in the trail files
- ❑ Master Oracle GoldenGate facilities to detect and resolve data conflicts in active-to-active replication implementations
- ❑ Perform zero-downtime database migration
