Informacje o szkoleniu

This course provides the knowledge and skills to implement DevOps processes. Students will learn how to use source control, scale Git for an enterprise, and implement and manage build infrastructure.

Benefits: After completing this course, students will be able to:

- Describe the benefits of using source control
- Migrate from TFVC to Git
- Scale Git for Enterprise DevOps
- Implement and manage build infrastructure
- Manage application config & secrets
- Implement a mobile DevOps strategy

Target audience: Students in this course are interested in implementing DevOps processes or in passing the Microsoft Azure DevOps Solutions certification exam.

Prerequisites:

Fundamental knowledge about Azure, version control, Agile software development, and core software development principles.

It would be helpful to have experience in an organization that delivers software.
