Informacje o szkoleniu

About this course

This course provides the knowledge and skills to implement dependency management. Students will learn how to design a dependency management strategy and manage security and compliance.

Skills gained

After completing this course, students will be able to:

Recommend artifact management tools and practices

Abstract common packages to enable sharing and reuse

Inspect codebase to identify code dependencies that can be converted to packages

Identify and recommend standardized package types and versions across the solution

Refactor existing build pipelines to implement version strategy that publishes packages

Manage security and compliance

Inspect open source software packages for security and license compliance to align with corporate standards

Configure build pipeline to access package security and license rating

Configure secure access to package feeds

Audience profile

Students in this course are interested in implementing dependency management or in passing the Microsoft Azure DevOps Solutions certification exam.

Prerequisites

Fundamental knowledge about Azure, version control, Agile software development, and core software development principles. It would be helpful to have experience in an organization that delivers software.
