### Informacje o szkoleniu

This course provides IT Security Professionals with the knowledge and skills needed to implement security controls, maintain an organization's security posture, and identify and remediate security vulnerabilities. This course includes security for identity and access, platform protection, data and applications, and security operations.

Benefits: After completing this course, students will be able to:

- Describe specialized data classifications on Azure
- Identify Azure data protection mechanisms
- Implement Azure data encryption methods
- Secure Internet protocols and how to implement them on Azure
- Describe Azure security services and features

Target audience: This course is for Azure Security Engineers who are planning to take the associated certification exam, or who are performing security tasks in their day-to-day job. This course would also be helpful to an engineer that wants to specialize in providing security for Azure-based digital platforms and play an integral role in protecting an organization's data. Prerequisites: To get the most out of this course students should:

- Understand security best practices and industry security requirements such as defense in depth, least privileged access, role-based access control, multi-factor authentication, shared responsibility, and zero trust model.
  - Be familiar with security protocols such as Virtual Private Networks (VPN), Internet Security Protocol (IPSec), Secure Socket Layer (SSL), disk and data encryption methods.
  - Have some experience deploying Azure workloads. This course does not cover the basics of Azure administration, instead the course content builds on that knowledge by adding security specific information.
  - Have experience with Windows and Linux operating systems and scripting languages. Course labs may use PowerShell and the CLI.
- Microsoft Azure Administrator Associate

To get ready for class, consider this free online training.

- Azure Fundamentals
- AZ-104: Prerequisites for Azure Administrators

## Wymagania wstępne

Brak

## Zagadnienia poruszane podczas szkolenia

- ❑ Module 1: Manage Identity and Access
- ❑ Module 2: Implement Platform Protection
- ❑ Module 3: Secure Data and Applications
- ❑ Module 4: Manage Security Operations

## Informacje dodatkowe

Brak

## Najbliższe terminy
