### Informacje o szkoleniu

Gain the necessary knowledge for designing Azure AI solution by building a customer support chat Bot using artificial intelligence from the Microsoft Azure platform including language understanding and pre-built AI functionality in the Azure Cognitive Services.

Target audience:

This course is aimed at Cloud Solution Architects, Azure artificial intelligence designers, and AI developers.

Prerequisites:

Before attending this course, students must have:

Azure Fundamentals

Understanding of Azure storage technologies

C# Knowledge

### Wymagania wstępne

Brak

### Zagadnienia poruszane podczas szkolenia

- Module 1: Introducing Azure Cognitive ServicesThe student will learn about the available Cognitive Services on Microsoft Azure and their role in architecting AI solutions.Lessons
- Module 2: Creating BotsThe student will learn about the Microsoft Bot Framework and Bot Services.Lessons
- Module 3: Enhancing Bots with QnA MakerThe student will learn about the QnA Maker and how to integrate Bots and QnA Maker to build up a useful knowledge base for user interactions.Lessons
- Module 4: Learn How to Create Language Understanding Functionality with LUISThe student will learn about LUIS and how to create intents and utterances to support a natural language processing solution.Lessons
- Module 5: Enhancing Your Bots with LUISThe student will learn about integrating LUIS with a Bot to better understand the users' intentions when interacting with the Bot.Lessons
- Module 6: Integrate Cognitive Services with Bots and Agents
