Informacje o szkoleniu

This course is all about communication between apps and services. Students will learn how to create and manage their own APIs by using API Management, and how to use the different event- and message-based services in Azure within their development solutions. Throughout the course students learn how to create and integrate these resources by using the Azure Portal, Azure CLI, REST, and application code.

Audience profile

Students in this course are interested in Azure development or in passing the Microsoft Azure Developer Associate certification exam.

Students should have 1-2 years experience as a developer. This course assumes students know how to code and have a fundamental knowledge of Azure.

It is recommended that students have some experience with PowerShell or Azure CLI, working in the Azure portal, and with at least one Azure-supported programming language. Most of the examples in this course are presented in C\# .NET.
