### Informacje o szkoleniu

This course will provide foundational level knowledge of cloud services and how those services are provided with Microsoft Azure. The course can be taken as an optional first step in learning about cloud services and Microsoft Azure, before taking further Microsoft Azure or Microsoft cloud services courses.

The course will cover general cloud computing concepts as well as general cloud computing models and services such as Public, Private and Hybrid cloud and Infrastructure-as-a-Service (IaaS), Platform-as-a-Service(PaaS) and Software-as-a-Service (SaaS).

It will also cover some core Azure services and solutions, as well as key Azure pillar services concerning security, privacy, compliance and trust. It will finally cover pricing and support services available with Azure.

#### Benefits:

After completing this course, learners should be able to:

- Plan, develop, and implement an Operating System deployment, upgrade, and update strategy.
- Understand the benefits and methods of co-management strategies.
- Plan and implement device enrollment and configuration.
- Manage and deploy applications and plan a mobile application management strategy.
- Manage users and authentication using Azure AD and Active Directory DS.
- Describe and implement methods used to protect devices and data.

Target audience : The Modern Desktop Administrator deploys, configures, secures, manages, and monitors devices and client applications in an enterprise environment. Responsibilities include managing identity, access, policies, updates, and apps. The MDA collaborates with the M365 Enterprise Administrator to design and implement a device strategy that meets the business needs of a modern organization.

The Modern Desktop Administrator must be familiar with M365 workloads and must have strong skills and experience of deploying, configuring, and maintaining Windows 10 and non-Windows devices. The MDA role focuses on cloud services rather than on-premises management technologies.

#### Prerequisites:

The Modern Desktop Administrator must be familiar with M365 workloads and must have strong skills and

experience of deploying, configuring, and maintaining Windows 10 and non-Windows devices. The MDA role focuses on cloud services rather than on-premises management technologies. It is recommended

## Wymagania wstępne

Brak

## Zagadnienia poruszane podczas szkolenia

- ▣ Module 1: Planning an Operating System Deployment Strategy
- ▣ Module 2: Implementing Windows 10
- ▣ Module 3: Managing Updates for Windows 10
- ▣ Module 4: Device Enrollment
- ▣ Module 5: Configuring Profiles
- ▣ Module 6: Application Management
- ▣ Module 7: Managing Authentication in Azure AD
- ▣ Module 8: Managing Device Access and Compliance
- ▣ Module 9: Managing Security
