### Informacje o szkoleniu

#### About this course

In this course you will learn about the architecture of the modern messaging infrastructure with Exchange Server and Exchange Online and how to deploy messaging in different scenarios and organizations. You will be guided through the initial deployment process and introduced to the messaging management tools. You will learn how to create and manage different types of recipients, and how to create and manage Exchange Server mailbox databases, which serve as storage locations for all messaging data. Finally, you will be introduced to messaging infrastructure organizational settings, such as how to manage authentication for your messaging environment, how to configure quotas for users in the organization, and how to configure organization sharing with federation.

#### Czego się nauczysz

#### At course completion

After completing this course, students will be able to:

Understand the Modern Messaging Architecture

Deploy and Manage a Modern Messaging Architecture

Create and Manage Exchange Recipients

Manage Email Addresses, Lists, and Resources

Plan for Mailbox Databases

Create and Manage Mailbox Databases

Manage Authentication for Messaging

Configure Organizational Settings

## Configure Organizational Sharing

Do kogo skierowane jest to szkolenie

Audience profile

The Messaging Administrator deploys, configures, manages, and troubleshoots recipients, permissions, mail protection, mail flow, and public folders in both on-premises and cloud enterprise environments. Responsibilities include managing message hygiene, messaging infrastructure, and hybrid configuration and migration. The Messaging Administrator also implements and manages disaster recovery, high availability, and client access. To implement a secure hybrid topology that meets the business needs of a modern organization, the Messaging Administrator must collaborate with the Security Administrator and Microsoft 365 Enterprise Administrator. The Messaging Administrator should have a working knowledge of authentication types, licensing, and integration with Microsoft 365 applications.

Wymagania wst pne

Prerequisites

Proficient understanding of DNS.

Basic understanding of messaging within Exchange Server or Exchange Online.

Basic understanding of Active Directory and domain controller infrastructure along with identity management.

Basic functional experience with Microsoft 365 services and directory synchronization.

At least 5 years of general IT experience.
