### Informacje o szkoleniu

#### About this course

In this course you will learn how to manage user profiles and apps with proper permission settings. We will also discuss how to plan and configure Managed Metadata, Business Connectivity Services, and search allowing content to be found, consumed, and governed across Office 365.

This course is designed for IT Professionals who deploy and manage the teamwork infrastructure in their organization.

This is the second in a series of four courses for the Teamwork administrator. These courses help prepare for the exam MS-300: Deploying Microsoft 365 Teamwork.

#### Benefits

After completing this course, students will be able to:

Describe how to configure user profile properties.

Describe how to manage audiences

Describe how to use the App Catalog to make custom apps.

Create and manage term groups, term sets, and terms

Describe the difference between modern and classic search experiences.

#### Target audience

This course is for the Microsoft 365 teamwork administrator role. The role is responsible for configuring, deploying, and managing Office 365 and Azure workloads that focus on efficient and effective collaboration and adoption. They manage apps, services, and supporting infrastructure to meet business requirements. The administrator is aware of and can differentiate between products and services but may not directly manage each product or service.

The Teamwork administrator must be able to deploy, manage, migrate, and secure SharePoint (online, on-premises, and hybrid), OneDrive, and Teams.

The Teamwork administrator has a fundamental understanding of integration points with the following apps and services: Office, PowerApps, Flow, Yammer, Microsoft Graph, Stream, Planner, and Project. The administrator

understands how to integrate third-party apps and services including line-of-business applications.

#### Prerequisites

Learners should start this course already having the following skills:

Experience with Windows PowerShell.

Basic understanding of Active Directory and Azure AD.

Basic understanding of mobile device management, and alternative operating systems (Android and macOS).

#### Wymagania wstępne

Brak

#### Zagadnienia poruszane podczas szkolenia
